

DAVID H. BAILEY

30 May 2017

Research website: <http://www.davidhbailey.com>

Affiliations:

1. Senior Scientist (retired), Computational Research Department, Lawrence Berkeley National Laboratory.
2. Research Associate, Department of Computer Science, University of California, Davis (February 2013 to present).

Academic background:

1. B.S. 1972, mathematics, Brigham Young University
2. Ph.D. 1976, mathematics, Stanford University

Professional society memberships:

1. American Association for the Advancement of Science (AAAS)
2. American Mathematical Society (AMS)
3. Association for Computing Machinery (ACM)
4. IEEE Computer Society (IEEE CS)
5. Mathematical Association of America (MAA)
6. Society for Industrial and Applied Mathematics (SIAM)
7. Australian Mathematical Society (AusMS)

Major professional society awards (most recent listed last):

1. Sidney Fernbach Award, IEEE Computer Society (IEEE CS), 1993
2. Chauvenet Prize, Mathematical Association of America (MAA), 1993
3. Merten Hesse Prize, Mathematical Association of America (MAA), 1993
4. Gordon Bell Prize, Association for Computing Machinery (ACM), 2008
5. Levi L. Conant Prize, American Mathematical Society (AMS), 2017

Bailey is the only person to have received major awards from all four of these professional societies: ACM, AMS, IEEE CS and MAA.

Other significant awards and designations (most recent listed last):

1. *1994 H. Julian Allen Award*. This award is presented annually by NASA Ames Research Center for outstanding research work and papers. https://history.arc.nasa.gov/awards_hjallen.htm
2. *CSE Algorithms of the Century*. The PSLQ algorithm, which was defined in a paper co-authored by Bailey, Helaman Ferguson and Stephen Arno, was named one of the ten “algorithms of the century” in 2000 by the editors of *Computing in Science and Engineering*.
3. *Finalist for the 2006 Edge of Computation Prize*. This award was granted in 2006 for a leading-edge contribution in computational science. The list of 48 finalists included many of the world’s most distinguished figures in modern computer science and technology. See <http://www.edge.org/conversation/the-edge-of-computation-science-prize>.
4. *ACM Distinguished Speaker*. Bailey has been designated a “Distinguished Speaker” by the Association for Computing Machinery: http://dsp.acm.org/view_lecturer.cfm?lecturer_id=5123.

5. *2015 Test of Time Award*. This is awarded by the SC Conference (ACM and IEEE CS).
6. *2017 Prose award* (Honorable Mention) in category “Textbook/Best in Physical Sciences and Mathematics.” Bailey co-authored a chapter in the book *Reproducibility: Principles, Problems, Practices and Prospects*. See <https://proseawards.com/winners/2017-award-winners/>.

Overview of research work:

High performance computing. Bailey is a leading figure in the field of high-performance scientific computing, with research ranging from numerical algorithms to supercomputer performance studies. He is author or co-author of one book and over 100 papers in this field. His paper “The NAS parallel benchmarks” (co-authored with several colleagues at NASA Ames Research Center) is widely cited in performance studies of scientific computer systems. His paper “FFTs in external or hierarchical memory” presented a technique for performing the fast Fourier transform (FFT) on parallel and hierarchical memory computers that is the now basis of many FFT implementations on modern computer systems. He has received the Sidney Fernbach Award from the IEEE Computer Society, the Gordon Bell Prize from the Association for Computing Machinery, and the Test of Time Award from the ACM/IEEE Supercomputing Conference.

Computational and experimental mathematics. Bailey is also a leading figure in the field of computational and experimental mathematics, applying high performance computing to problems in research mathematics. He is author or co-author of six books and over 100 papers in this field, many of them in conjunction with his long-time collaborator Jonathan M. Borwein of the University of Newcastle, Australia (deceased August 2, 2016). Bailey is also a co-author of three widely used high-precision computation software packages. His best-known paper in this area, “On the rapid computation of various polylogarithmic constants,” co-authored with Peter Borwein (Jonathan Borwein’s brother) and Simon Plouffe, describes a new formula for pi that permits one to directly calculate binary digits of pi beginning at an arbitrary starting position (this formula was discovered using Bailey’s computer implementation of the PSLQ algorithm). In two more recent papers, Bailey and the late Richard Crandall demonstrated a connection between these formulas and a fundamental question about digit randomness. Bailey has received the Chauvenet Prize and the Merten Hesse Prize from the Mathematical Association of America, and the Levi L. Conant Prize from the American Mathematical Society.

Financial mathematics. Bailey, together with his colleagues Jonathan Borwein (deceased), Marcos Lopez de Prado (of Guggenheim Partners) and Jim Qiji Zhu (of Western Michigan University), have written a series of papers on mathematical finance. Their best-known paper in this area, “Pseudo-mathematics and financial charlatanism: The effects of backtest overfitting on out-of-sample performance,” has attracted considerable interest in the field – see “Press reports” below.

Other activities. Bailey operates the Math Scholar blog (<http://www.mathscholar.org>), devoted to mathematics, computing and modern science, and (in conjunction with Marcos Lopez de Prado and Jim Qiji Zhu) the Financial Math blog (<http://www.financial-math.org>), devoted to financial mathematics and abuses of mathematics in the field. He has also written articles for the Huffington Post and the Conversation –see publication list below.

See “Books” below for a list of published books, and “Publications” below for a full list of over 290 articles, including, in many cases, web links to preprint copies.

Previous positions:

1972-1976: Stanford University, Stanford, CA. Bailey taught courses in calculus to undergraduate students, in addition to his studies in probability and ergodic theory leading to the Ph.D.

1976-1980: Department of Defense, Washington, DC. Bailey worked on highly mathematical and computationally intensive problems of interest to DOD.

1980-1982: TRW, Inc., Sunnyvale, CA. Bailey developed computational software for a defense electronics contractor.

1982-1984: SRI International, Menlo Park, CA. Bailey worked on a DOD-funded project.

1984-1998: NASA Ames Research Center, Moffett Field, CA. Bailey worked for a large super-computer center with hundreds of users nationwide. He published papers on numerical algorithms, parallel computing, computing technology and performance analysis. He also supervised a research group in computational algorithms and applications. He was a lead author of the NAS Parallel Benchmarks, which was developed to assess and compare the sustained performance of scientific supercomputers. Bailey also participated in (and in one case personally directed) several large supercomputer procurements.

Professional community activities (since 1989; most recent listed last):

1. Program Co-Chair, 1988 International Conference on Parallel Processing (1989).
2. Deputy Program Chairman, Supercomputing Conference (1990).
3. Program Committee, International Conference on Supercomputing (1991-1993).
4. Editor, *IEEE Transactions on Parallel and Distributed Computing* (1990-1993).
5. Program Committee, SIAM Parallel Processing Conference (1995).
6. Chair, Petaflops Algorithm Workshop (1997).
7. Tutorial Committee, Supercomputing Conference (1997).
8. Board of Governors, Institute for Mathematics and Applications (1996-1998).
9. Sidney Fernbach Award Committee (1995-1998); Chair (1996-1998).
10. Chair, MSRI Parallel Symbolic Computation Workshop (1998).
11. Governing Board, Supercomputing SIG, Association for Computing Machinery (1993-1999).
12. Program Committee, Petaflops-2 Conference (1999).
13. Review Panel, DoE ASCI University Alliance program (1998-2000).
14. Review Committee, NSF Information Technology Research proposal review panel (2000).
15. Program Committee, International Conference on High Performance Computing (2000).
16. Vice Chair, International Parallel and Distributed Processing Symposium (2001).
17. Program Committee, IEEE Conference on Computer Arithmetic (2001-2003).
18. Board of Editors, *International Journal of High Speed Computing* (1992-2004).
19. Co-Chair, Experimental Mathematics Workshop (2004).
20. Co-Chair, “Experimental Mathematics in Action,” two-day MAA short course (2006).

21. RIACS Science Council (1999-2007); Chairman (2001-2006).
22. Program Committee, Intl. Conf. on Supercomputing (ISC07) (2007).
23. Program Committee, Intl. Conf. on Parallel and Distributed Computing (IPDPS) (2007-2008).
24. Program Committee, Conference on Real Numbers and Arithmetic (2008).
25. Seymour Cray Prize Committee (2002-2007); Chairman (2005-2007).
26. Program Committee, SciDAC 2009 (2009).
27. Program Committee, IEEE International Parallel and Distributed Processing Symposium (IPDPS) (2010).
28. Program Committee, 1st International Workshop on Adaptive Self-Tuning Computing Systems for the Exaflop Era (ADAPT2011).
29. Program Committee, EXADAPT 2012, co-located with ASPLOS 2012 (2012).
30. ACM Gordon Bell Prize Committee (1996-2007, 2012, Chair 1998-2002, 2007, 2013).
31. Technical Papers Committee, Supercomputing Conference (1991-1992, 1997-1999, 2002, 2012-2013, Chair 1990, 1999)
32. Test of Time Committee, Supercomputing Conference (2012-2013)
33. Steering Committee, Supercomputing Conference series (2009-2014).
34. ICERM Workshop on Reproducibility in Computational and Experimental Mathematics (2012).
35. ICERM Workshop on Challenges in 21st Century Experimental Mathematical Computation, co-organizer (2013-2014).
36. Symposium on Reproducibility: Principles, Problems, Practices, Zurich, Switzerland, 29 Sep 2014, co-organizer (2014).
37. Program Committee, 23rd IEEE Symposium on Computer Arithmetic (ARITH23) (2015-2016).
38. Board of Editors, *Notices of the American Mathematical Society* (2009-2016).
39. Tutorial Committee, Supercomputing Conference (1993-1994, 2011, 2016).
40. Board of Editors, *Journal of Supercomputing* (1994-present).
41. Board of Editors, *Intl. Journal of Computational Science and Engineering* (2006-present).
42. Board of Editors, *IEEE Transactions on Mathematical Software* (2013-present).
43. Associate Editor, *American Mathematical Monthly* (2016-present).

Citation statistics (as of 4 May 2017):

Google Scholar: Publications = 440; citations = 12,758; h-index = 50; i10 index = 131.
 See: <http://scholar.google.com/citations?user=M2CwO2QAAAAJ>

ResearchGate: Publications = 370; citations = 9262; RG score = 33.74.

Presentations (since 2009; most recent listed last):

1. “High-Precision Arithmetic and Experimental Mathematics,” presentation to Sun Microsystems, Berkeley, CA (Jan 2009). [PDF](#)
2. “High-Precision Numerical Integration on High-Performance Computers,” High-Dimensional Approximation 2009 (HDA’09), invited talk, Sydney, Australia (Feb 2009). [PDF](#)
3. “Experimental Mathematics, Multicore Processors and Highly Parallel Computing,” SIAM Computational Science and Engineering Conference, invited talk, Miami, FL (Mar 2009). [PDF](#)
4. “High-Precision Arithmetic and Mathematical Physics,” invited lecture at Computer Algebra and Particle Physics (CAPP) school, DESY, Zeuthen, Germany (Mar 2009); similar talk given

- at ETH-Zurich, Zurich, Switzerland (Apr 2009). [PDF](#)
5. “High-Precision Arithmetic and Experimental Mathematics,” invited seminar talk, Grinnell College, Grinnell, Iowa (Apr 2009): [PDF](#)
 6. “High-Precision Arithmetic and Experimental Mathematics,” invited talk, East Coast Computer Algebra Day, Kingstown, RI (May 2009): [PDF](#)
 7. “High-Precision Arithmetic and Mathematical Physics,” invited lecture, ENRAGE09, Max-Planck Institute, Dresden, Germany (May 2009): [PDF](#)
 8. “Misleading Performance Claims in Parallel Computations,” invited talk, 2009 Design Automation Conference, San Francisco (Jul 2009): [PDF](#)
 9. “Computing: The Third Mode of Scientific Discovery,” invited convocation talk, Grinnell College, Grinnell, Iowa (Apr 2009); updated version given at University of Newcastle, Australia (Aug 2009): [PDF](#)
 10. “Experimental Mathematics Meets Mathematical Physics,” invited lecture, CARMA Workshop on Multidimensional Numerical Integration and Special Function Evaluation, University of Newcastle, Australia (Aug 2009); also given at Macquarie University (Dept. of Mathematics), Sydney, Australia (Aug 2009); updated version presented to Fields Institute Workshop on Experimentation in Number Theory, Simon Fraser University, Burnaby, BC Canada (Sep 2009): [PDF](#)
 11. “Experimental Mathematics, Multicore Processors and Highly Parallel Computing,” University of Sydney (Dept. of Mathematics), Sydney, Australia, invited seminar (Sep 2009), also given at Macquarie University (Dept. of Electrical Engineering), Sydney, Australia (Sep 2009). [PDF](#)
 12. “Computing as the Third Mode of Scientific and Mathematical Discovery,” University of Delaware (Dept. of Computer Science), Wilmington, DE, invited seminar (Mar 2010), also given as keynote address at SharcNet Users Group Meeting, Toronto, Canada (May 2010); also given at the Barcelona Supercomputer Center (Jun 2010). [PDF](#)
 13. “High-Precision Computation: Mathematical Physics and Dynamics,” Joint SIAM/RSME-SCM-SEMA Meeting on Emerging Topics in Dynamical Systems and Partial Differential Equations, minisymposium talk Barcelona, Spain (June 2010). [PDF](#)
 14. “High-Precision, Highly Parallel Numerical Integration,” University of Zaragoza (Dept. of Mathematics), Zaragoza, Spain, invited seminar (Jun 2010). [PDF](#)
 15. “A Mathematical and Data-Driven Approach to Cybersecurity,” SIAM Annual Conference, minisymposium talk, Pittsburgh, PA (Jul 2010). [PDF](#)
 16. “High-Precision Numerical Integration and Experimental Mathematics,” University of Newcastle (CARMA center), Newcastle, Australia (18 Aug 2010). [PDF](#)
 17. “The PSLQ Algorithm: Techniques for Efficient Computation,” University of Newcastle (CARMA center), Newcastle, Australia (24 Aug 2010). [PDF](#)
 18. “Hand-to-Hand Combat with Thousand-Digit Integrals,” Western Number Theory Conference, Provo, UT (17 Dec 2010). [PDF](#)
 19. “12 Ways to Fool the Masses: Fast Forward to 2011,” Manycore and Accelerator-based High-performance Scientific Computing Workshop, University of California, Berkeley (26-29 Jan 2011). [PDF](#)
 20. “A Quartically Convergent Square Root Algorithm” (talk on Indian mathematics), Workshop on Computational and Analytical Mathematics in Honour of Jonathan Borwein’s 60th Birthday, Simon Fraser University, Burnaby, BC, Canada (16-20 May 2011). [PDF](#)
 21. “Performance Tuning of Science Applications,” Discovery 2015: HPC and Cloud Compu-

- ting Workshop, Berkeley, CA (15-24 Jun 2011). Also given at Extreme Computing and Its Applications for the Nuclear Physics/Applied Mathematics/Computer Science Interface, Seattle, WA (28-29 Jun 2011). [PDF](#)
22. “Creationism and Intelligent Design: False Friends,” International Society for the History, Philosophy, and Social Studies of Biology (ISHPSSB 2011), Salt Lake City, UT (10-15 Jul 2011). [PDF](#)
 23. “Performance Research and the SUPER Project,” FastMath Workshop, Livermore, CA (7-8 Nov 2011). [PDF](#)
 24. “Nonnormality of the Stoneham Constants,” West Coast Number Theory Conference, Pacific Grove, CA (17 Dec 2011). [PDF](#)
 25. “Normal and Nonnormal Mathematical Constants,” University of Newcastle Mathematics Colloquium, Newcastle, NSW, Australia, 29 Aug 2012. [PDF](#)
 26. “Hand-to-Hand Combat with Thousand-Digit Integrals,” Workshop on Computational and Analytical Mathematics in Honour of Jonathan Borwein’s 60th Birthday, Simon Fraser University, Burnaby, BC, Canada (16-20 May 2011); updated version at University of Newcastle Access Grid Colloquium, Newcastle, NSW, Australia (3 Sep 2012). Publications:

Below is a catalogue of Bailey’s publications other than books. It includes:

- Refereed journal articles.

- Refereed conference papers.
- Other unrefereed technical reports.
- Articles published in the *Huffington Post* and the *Conversation*.

This list does **not** include several hundred other articles published in venues such as:

- The [Math Scholar blog](#).
- The [Math Drudge blog](#).
- The [Mathematical Investor blog](#).
- The [SMR blog](#).

Preprint copies are provided below in most cases. They are listed in approximate chronological order, with **most recent listed last**.
