

DAVID H. BAILEY

15 March 2018

Research website: <http://www.davidhbailey.com>

Affiliations:

1. Senior Scientist (retired), Lawrence Berkeley National Laboratory
2. Research Associate, Department of Computer Science, University of California, Davis

Academic background:

1. B.S. 1972, mathematics, Brigham Young University
2. Ph.D. 1976, mathematics, Stanford University

Professional society memberships:

1. American Association for the Advancement of Science (AAAS)
2. American Mathematical Society (AMS)
3. Association for Computing Machinery (ACM)
4. IEEE Computer Society (IEEE CS)
5. Mathematical Association of America (MAA)
6. Society for Industrial and Applied Mathematics (SIAM)
7. Australian Mathematical Society (AusMS)

Major professional society awards (most recent listed last):

1. Sidney Fernbach Award, IEEE Computer Society (IEEE CS), 1993
2. Chauvenet Prize, Mathematical Association of America (MAA), 1993
3. Merten Hesse Prize, Mathematical Association of America (MAA), 1993
4. Gordon Bell Prize, Association for Computing Machinery (ACM), 2008
5. SC Test of Time Award (ACM and IEEE CS), 2015
6. Levi L. Conant Prize, American Mathematical Society (AMS), 2017

Bailey is the only person to have received major awards from all four of these professional societies: ACM, AMS, IEEE CS and MAA.

Other significant awards and designations (most recent listed last):

1. *1994 H. Julian Allen Award*. This award is presented annually by NASA Ames Research Center for outstanding research work and papers. https://history.arc.nasa.gov/awards_hjallen.htm
2. *CSE Algorithms of the Century*. The PSLQ algorithm, which was defined in a paper co-authored by Bailey, Helaman Ferguson and Stephen Arno, was named one of the ten “algorithms of the century” in 2000 by the editors of *Computing in Science and Engineering*.
3. *Finalist for the 2006 Edge of Computation Prize*. This award was granted in 2006 for a leading-edge contribution in computational science. The list of 48 finalists included many of the world’s most distinguished figures in modern computer science and technology. See <http://www.edge.org/conversation/the-edge-of-computation-science-prize>.
4. *ACM Distinguished Speaker*. Bailey has been designated a “Distinguished Speaker” by the Association for Computing Machinery: http://dsp.acm.org/view_lecturer.cfm?lecturer_id=5123.
5. *2017 Prose award* (Honorable Mention) in category “Textbook/Best in Physical Sciences and Mathematics.” Bailey co-authored a chapter in the book *Reproducibility: Principles, Problems, Practices and Prospects*. See <https://proseawards.com/winners/2017-award-winners/>.

Overview of research work:

High performance computing. Bailey is a leading figure in the field of high-performance scientific computing, with one book and over 100 published paper in this area. His paper “The NAS parallel benchmarks” (co-authored with several colleagues at NASA Ames Research Center) is widely cited in performance studies of

scientific computer systems. His paper “FFTs in external or hierarchical memory” presented a technique for performing the fast Fourier transform (FFT) on parallel and hierarchical memory computers that is now the basis of many FFT implementations on modern computer systems. He has received the Sidney Fernbach Award from the IEEE Computer Society (1993), the Gordon Bell Prize from the Association for Computing Machinery (2008), and the Test of Time Award from the ACM/IEEE Supercomputing Conference (2015).

Computational and experimental mathematics. Bailey is also a leading figure in the field of computational and experimental mathematics. He has written five books and over 100 papers in this area, together with several widely used high-precision computation packages. Many of his books and papers were co-authored with Jonathan M. Borwein of the University of Newcastle, Australia (deceased 2016). Bailey’s best-known paper in this area, “On the rapid computation of various polylogarithmic constants,” co-authored with Peter Borwein (Jonathan Borwein’s brother) and Simon Plouffe, describes a new formula for pi that permits one to directly calculate binary digits of pi beginning at an arbitrary starting position. In two other papers, Bailey and Richard Crandall (deceased 2012) demonstrated a connection between these formulas and a fundamental question about digit randomness. Bailey has received the Chauvenet Prize and the Merten Hesse Prize from the Mathematical Association of America (1993), and the Levi L. Conant Prize from the American Mathematical Society (2017).

Financial mathematics. Bailey, together with Jonathan Borwein (deceased), Marcos Lopez de Prado and Jim Qiji Zhu, have written a series of papers on mathematical finance. Their best-known paper in this area, “Pseudo-mathematics and financial charlatanism: The effects of backtest overfitting on out-of-sample performance,” has attracted significant interest in the field – see press reports below for details.

Other professional activities. In addition to the technical papers mentioned above, Bailey has authored or co-authored over 300 less formal articles in venues such as the *Huffington Post*, the *Conversation* and various blogs. Bailey operates the Math Scholar blog, devoted to mathematics, computing and modern science, and the Mathematical Investor blog, devoted to financial mathematics and abuses of mathematics in the field.

See “Books” below for a list of published books, and “Publications” for a full list of over 500 technical papers and articles.

Previous positions:

1972-1976: Stanford University, Stanford, CA. Bailey taught courses in calculus to undergraduate students, in addition to his studies in probability and ergodic theory leading to the Ph.D.

1976-1980: Department of Defense, Washington, DC. Bailey worked on highly mathematical and computationally intensive problems of interest to DOD.

1980-1982: TRW, Inc., Sunnyvale, CA. Bailey developed computational software for a defense electronics contractor.

1982-1984: SRI International, Menlo Park, CA. Bailey worked on a DOD-funded project.

1984-1998: NASA Ames Research Center, Moffett Field, CA. Bailey worked for a large supercomputer center with hundreds of users nationwide. He published papers on numerical algorithms, parallel computing, computing technology and performance analysis. He also supervised a research group in computational algorithms and applications. He was a lead author of the NAS Parallel Benchmarks, which was developed to assess and compare the sustained performance of scientific supercomputers. Bailey also participated in (and in one case personally directed) several large supercomputer procurements.

Professional community activities (since 1989; most recent listed last):

1. Program Co-Chair, 1988 International Conference on Parallel Processing (1989).
2. Deputy Program Chairman, Supercomputing Conference (1990).
3. Program Committee, International Conference on Supercomputing (1991-1993).
4. Editor, *IEEE Transactions on Parallel and Distributed Computing* (1990-1993).
5. Program Committee, SIAM Parallel Processing Conference (1995).
6. Chair, Petaflops Algorithm Workshop (1997).
7. Tutorial Committee, Supercomputing Conference (1997).
8. Board of Governors, Institute for Mathematics and Applications (1996-1998).
9. Sidney Fernbach Award Committee (1995-1998); Chair (1996-1998).
10. Chair, MSRI Parallel Symbolic Computation Workshop (1998).
11. Governing Board, Supercomputing SIG, Association for Computing Machinery (1993-1999).
12. Program Committee, Petaflops-2 Conference (1999).
13. Review Panel, DoE ASCI University Alliance program (1998-2000).
14. Review Committee, NSF Information Technology Research proposal review panel (2000).
15. Program Committee, International Conference on High Performance Computing (2000).
16. Vice Chair, International Parallel and Distributed Processing Symposium (2001).
17. Program Committee, IEEE Conference on Computer Arithmetic (2001-2003).
18. Board of Editors, *International Journal of High Speed Computing* (1992-2004).
19. Co-Chair, Experimental Mathematics Workshop (2004).
20. Co-Chair, "Experimental Mathematics in Action," two-day MAA short course (2006).
21. RIACS Science Council (1999-2007); Chairman (2001-2006).
22. Program Committee, Intl. Conf. on Supercomputing (ISC07) (2007).
23. Program Committee, Intl. Conf. on Parallel and Distributed Computing (IPDPS) (2007-2008).
24. Program Committee, Conference on Real Numbers and Arithmetic (2008).
25. Seymour Cray Prize Committee (2002-2007); Chairman (2005-2007).
26. Program Committee, SciDAC 2009 (2009).
27. Program Committee, IEEE International Parallel and Distributed Processing Symposium (IPDPS) (2010).
28. Program Committee, 1st International Workshop on Adaptive Self-Tuning Computing Systems for the Exaflop Era (ADAPT2011).
29. Program Committee, EXADAPT 2012, co-located with ASPLOS 2012 (2012).
30. ACM Gordon Bell Prize Committee (1996-2007, 2012, Chair 1998-2002, 2007, 2013).
31. Technical Papers Committee, Supercomputing Conference (1991-1992, 1997-1999, 2002, 2012-2013, Chair 1990, 1999)
32. Steering Committee, Supercomputing Conference series (2009-2014).
33. ICERM Workshop on Reproducibility in Computational and Experimental Mathematics (2012).
34. ICERM Workshop on Challenges in 21st Century Experimental Mathematical Computation, co-organizer (2013-2014).
35. Symposium on Reproducibility: Principles, Problems, Practices, Zurich, Switzerland, 29 Sep 2014, co-organizer (2014).
36. Program Committee, 23rd IEEE Symposium on Computer Arithmetic (ARITH23) (2015-2016).
37. Board of Editors, *Notices of the American Mathematical Society* (2009-2016).
38. Tutorial Committee, Supercomputing Conference (1993-1994, 2011, 2016).
39. Board of Editors, *Journal of Supercomputing* (1994-present).
40. Board of Editors, *Intl. Journal of Computational Science and Engineering* (2006-present).
41. Test of Time Committee, Supercomputing Conference (2012-2013, 2018-present)
42. Board of Editors, *IEEE Transactions on Mathematical Software* (2013-present).
43. Board of Editors, *Experimental Mathematics* (2016-present).
44. Associate Editor, *American Mathematical Monthly* (2016-present).

Citation statistics (as of 24 February 2018):

Google Scholar: Publications = 440; citations = 16226; h-index = 55; i10 index = 155.

Publications:

Below is a catalogue of Bailey's publications (except books and presentations). This includes:

- Refereed journal articles.
- Refereed conference papers.
- Various other unrefereed technical reports.
- Articles published in the [Huffington Post](#).
- Articles published in the [Conversation](#).
- Articles published in the [Math Drudge blog \(2009-2016\)](#).
- Articles published in the [Math Scholar blog \(2017-present\)](#).
- Articles published in the [Mathematical Investor blog \(2013-2017\)](#).
- Articles published in the [New Mathematical Investor blog \(2017-present\)](#).

This list does not include numerous other articles published in various other venues such as the [SMR blog](#).

Preprint copies or HTML links are provided below in most cases. They are listed in approximate chronological order, with **most recent listed last**.
